Re: Part 'B' Permit Application
Pratt and Whitney Aircraft
CTD990672081

Dear Mr. Casey:

We acknowledge receipt of your request for an NOD response deadline extension from March 1, 1985 to March 22, 1985. Because of the continued effort by Pratt & Whitney Aircraft to make the on-site incineration system operational and the fact that the Part 'B' application is close to being complete for the remaining regulated units, the deadline of March 22, 1985 for submission of all Part 'B' information with respect to technical completeness would be acceptable. However, we further stress that the submission requested by the Department of Environmental Protection on March 22, 1985 should be complete in all permit application requirements or action will be taken by the Department of Environmental Protection to finalize the RCRA permitting process.

If there are any questions, please call 566-2264.

Sincerely,

George Dews
Sanitary Engineer
Hazardous Waste Management Section
